

Welcome to Niagara-on-the-Lake Wine Country!

Niagara-on-the-Lake ranked
Canada's #1 Food and Wine
Destination - TripAdvisor

Our wineries are nestled below the Niagara Escarpment amidst a landscape of vineyards and orchards stretching from the picturesque Niagara River Parkway to the shores of Lake Ontario. We're a close-knit neighbourhood of wineries each with a unique personality. You'll see this when you step up to our doors and you'll taste it in our wines.

Visit our large estates, medium-sized operations and boutiques (we recommend that you mix it up) and you will see that when it comes to our wines, size does not matter. Behind the doors of each winery you'll find friendly staff, stylish and relaxed tasting rooms and a wide range of wines to sample. Here you can experience the life of a winery.

About Our Terroir

The term "appellation" simply means name, or designation. It's commonly applied in wine-growing regions to identify the grape's region of origin. When you're renowned for making terroir wines it's important that the birthplace be noted. We want you to know exactly where in Niagara-on-the-Lake your wine was grown.

Within the Niagara Peninsula viticultural (grape-growing) area, Niagara-on-the-Lake is classified by VQA Ontario (Vintners Quality Alliance Ontario) as a distinct area. Bordered by the Niagara Escarpment, Lake Ontario and the Niagara River, our wineries share a climate moderated by the Escarpment and Lake Ontario. Yet across this expanse of land, our wineries are differentiated by geology, soils, elevation, temperature and precipitation, creating four distinct growing areas, or sub-appellations.

NL Niagara Lakeshore Vineyards receive abundant sunlight and temperatures are moderated by lake breezes. Sandy soils provide good drainage and the grapes produce full-bodied, flavourful wines.

FM Four Mile Creek The largest of the four sub-appellations, the area lies below the Escarpment stretching into a fertile plain. Red shale soils contain silt and clay and are optimal for growing many varieties.

SB St. David's Bench This area, carved by glaciers to form a natural bench below the Escarpment, has natural frost protection. Vineyards are planted on gentle slopes for good drainage in the rich clay soils.

NR Niagara River The Niagara Parkway winds along this narrow band bordering the Niagara River. Vines dig deep into the sandy soils and air currents moderate temperatures.
